Programming Concept	Cocoa Features	Xcode/App Structure	Data Structures	Frameworks	Swift Features	Objective-C Features	Persistence	Concurrency	Networking	Testing	Controllers	Interface
MVC	Notification Center	Bundles	Stack	UIKit	Closures	Properties	Core Data	Threads	JSON	XCTest	Network Controller	Table View & Cells
Functional Programming	Date Handling	Asset Catalogs	Queues	Foundation	Protocols	Blocks	NSUserDefaults	NSOperationsQueu	NSURLSession	ı	Navigation Controller	Autolayout
Singleton Pattern	Region Monitoring	Custom URL Schemes	Linked List	Core Data	Generics	Message Sending	NSCoding	GCD	OAuth		UIAlertController	Collection View
Lazy Loading	Local & Push Notificatio	App Submission	Arrays	Core Image	Extensions	@ sign	NSKeyedArchive	r	Callbacks		UllmagePickerController	Collection View Layou
Relational Databases	Location Manager	App States	Hash Table/Dictionar	Photos	Optionals	ARC & Pre-ARC			WebViews		UISplitViewController	Gesture Recognizers
Server/Client		Instruments		AVFoundation	Namespacing				NSURL		Tab Bar Controller	UISearchBar
HTTP Protocol		Localization		MapKit							Custom Containers	Animation
Regex		Debugging		Core Location								Custom Transitions
Big O Notation				iCloud								UIScrollView
Broadcast Pattern				SpriteKit								Map Annotations
REST API				CoreGraphics								Map View
Pointers				TextKit								Map Overlay
Public vs Private				Social								Data Detectors
OOP												Bezier Paths
Agile												Nib/Xibs
Unit Testing/TDD												Size Classes
Memory Management												UITextField
Subclassing												UILabel
Immutable vs Mutable												UITextView
												UllmageView/Ullmage
												Programmatic Layout
